## BENEFITS:

- Release of nutrients with GAL-XeONE is predictable and reliable. The coating has been precisely applied to ensure the effectiveness of each granule.
- Release of nutrients is not significantly affected by media type, moisture level, pH, or microbial activity.

SOIL / MEDIA TEMPERATURE	
RELEASE RATES	
50°F / 10.0°C	= 7-8 month
60°F / 15.5°C	= 6-7 month
70°F / 21.0°C	= 4-5 month ◊
80°F / 26.5°C	= 3-4 month

## APPLICATION RATES:

(Call for rates on larger containers.)  
Use LOW rate for low feeding, sensitive plants or under high soil temperatures.  
Use MEDIUM rate for medium to moderately heavy feeding plants.  
Use HIGH rate only for heavy feeding hardy plants.

These application rates are based on the average temperature at the fertilizer location of 70°F (21.0°C).  
Increase fertilizer application rates by 20% if average monthly temperatures are lower than 60°F (15.5°C).  
Lower application rates by 20% if average monthly temperatures are greater than 80°F (26.5°C).

## APPLICATION PRECAUTIONS:

- Trial before use of this product under your local growing conditions, application methods, and desired rates.
- Avoid application to plants under stress.
- If mixed media is not used within one week, leach thoroughly before using.
- Product left in media for more than one week will lose longevity resulting in reduced release time and wasted controlled release fertilizer.
- Avoid the use of media processing equipment that could change the integrity of the polymer coating.
- Avoid mounding of fertilizer against base of plant.
- Iron and other plant nutrients can cause staining of cement.

- Keep away from pools, ponds, and other bodies of water.
- When using potting media with higher cation exchange capacities use lower recommended rates of this formulation.
- When using supplemental liquid feed reduce the rate of this formulation accordingly.
- Do not incorporate into media prior to steam sterilization.
- This product is not recommended for dibble applications.
- To avoid buildup of soluble salts, occasional leaching may be necessary.
- CAUTION: Application of fertilizer materials containing Molybdenum (Mo) may result in forage crops containing levels of Molybdenum (Mo) that are toxic to ruminant animals.
