GENERAL INSTRUCTIONS

FUNGICIDE RESISTANCE WARNING

fungicides. For fungicide resistance management SHRAPNEL 600 SL is a Group 28 fungicide. Some naturally occurring fungal populations resistant to SHRAPNEL 600 SL and other Group 28 fungicides may exist through normal genetic variability in any fungal population. The resistant individuals can eventually dominate the fungi population if these fungicides are used repeatedly. These resistant fungi will not be controlled by SHRAPNEL 600 SL and other Group 28 fungicides, thus resulting in a reduction in efficacy and possible yield loss.

Since the occurrence of resistant fungi is difficult to detect prior to use, Indigo Specialty Products Pty Ltd accepts no liability for any losses that may result from the failure of SHRAPNEL 600 SL to control resistant fungi.
