Golf cart parts supplier

2016

Top 1 parts supplier in China

2020

EDACAR factory setup

2021

The first generation carts come out

2023

Global exporting commences

.....

# COMPANY PROFILE

EDACAR EV Co Ltd is a prominent frontrunner within the golf cart manufacturing sector.

Strategically situated in Dongguan city, in Guangdong Province, China, a globally acclaimed hub for manufacturing, the company's roots trace back to the inception of Dongguan EDA Electric Vehicle Technology Co., Ltd. in 2008. With an impressive 15-year legacy, marked by the production of top-tier golf cart components and accessories catering to esteemed brands such as CLUB CAR, E-Z-GO, and YAMAHA.

Drawing upon an extensive comprehension of prominent mainstream cart brands, EDACAR EV has effectively crafted a captivating range of golf carts and lightweight electric vehicles. These offerings showcase distinct proprietary designs, seamlessly integrating cutting-edge German technology and advanced processes.

At the core of our operations are state-of-the-art assembly lines, fortified with 11 robotic systems, underscoring our unwavering commitment to precision and operational efficiency. Our versatile product portfolio encompasses an array of vehicles, including golf carts, community carts, tourist vehicles, police patrol units, as well as specialized vehicles designed for airport and warehouse applications.

Recognized for their refined aesthetics, design excellence, precision engineering, ergonomic functionality, and unparalleled system stability, these models have garnered widespread acclaim from contented users spanning the globe. Our global footprint extends to Europe, America, and Australia, where we proudly export our vehicles.

Guided by a forward-looking perspective and unrelenting determination, EDACAR EV is poised to embrace emerging prospects and redefine industry boundaries. Our ceaseless pursuit of excellence and artisanship stands as the cornerstone of our endeavors, enabling us to consistently deliver superlative products and an unmatched driving experience to our esteemed clientele.

Extensive use of robotics in the manufacturing process

Major investment in advanced German Technology

Professional Assembling and Testing
