

GREEN SCORPION v8.0

Injection Control System

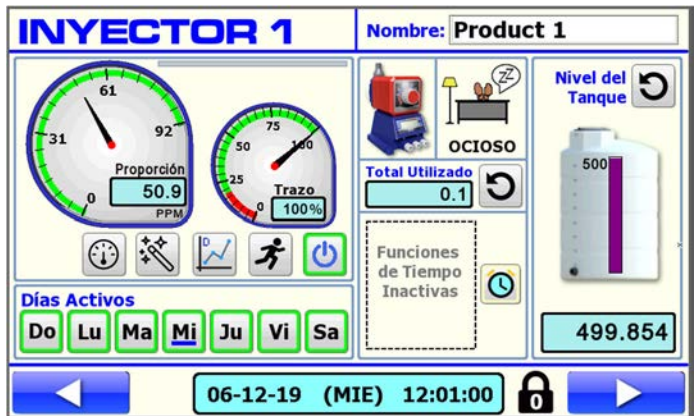

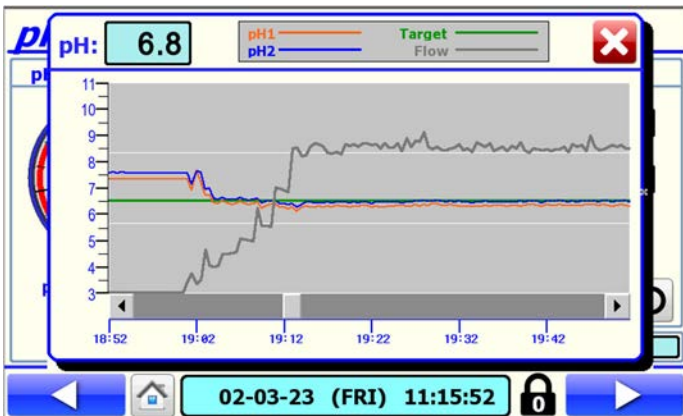

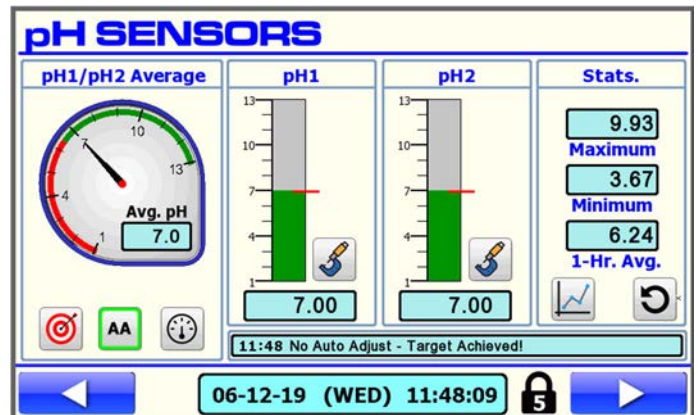

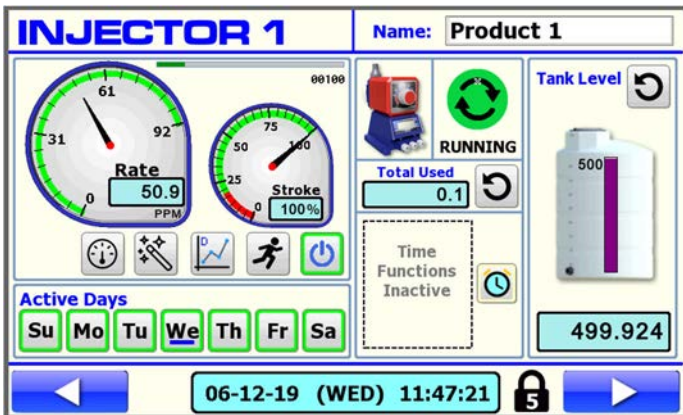

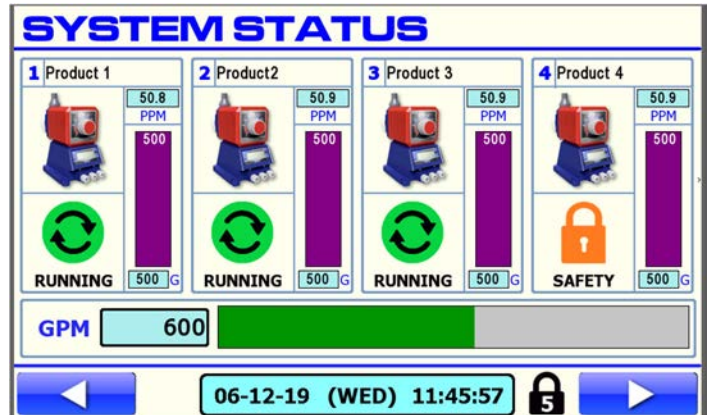

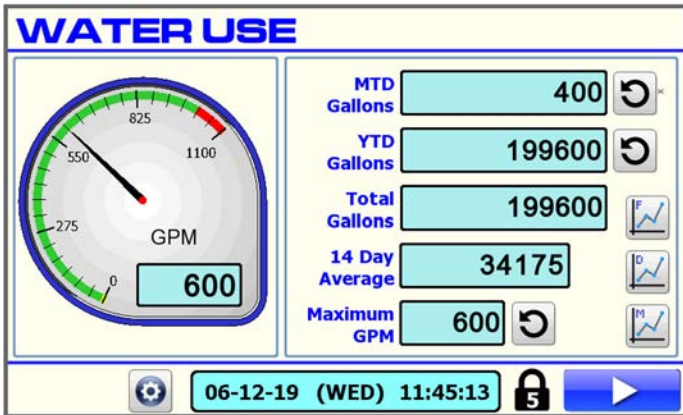

Description

In the fall of 2019, we introduced a revolution in injection control: our Green Scorpion 7 control system. This system was extremely well received. After selling around 200 GS7 controllers, we were notified that due to supply chain issues, we wouldn't be able to procure the core processor for the GS7 until July of 2023. Since we are always innovating here at WERECON, we just turned up the heat and developed the all-new Green Scorpion 8 injection control system. It's operational DNA was taken from the GS7, with many familiar features, but it is a whole new animal with new electronics and software.

Features

- Bright, 7" color touch screen, mounted behind a secondary window for added protection from the elements.
- All new SMT Technology electronics with a new smaller, faster and more capable processor.
- Now supports Ultrasonic Tank Level Sensors
- Wireless connectivity comes standard (Free Trial, Subscription required) Allows remote control and monitoring via most platforms (Android, Apple, Windows, etc.)
- USB Flash drive allows moving statistical system information to a PC for analysis on Excel™
- System can display either English or Spanish.
- Multi-level password security throughout.
- Super user-friendly operator interface.
- Rate-Wizard performs fertility calculations for you and shows proper PPM settings.
- Easily and economically upgradeable from GS7
